 Tokyo Design Technology Center (TECH.C.)
Comic Illustration Course, Grade 1

International Day 2017 (School festival) was held in TECH.C. on June 10th & 11th. Displayed exhibitions, stages and food projects were mainly held and planned by students. There were cosplay contests, talk show of special guest, Max Murai. It became a successful International day. Executive committee was formed in March. Freshman students used homeroom class or the time after school to prepare International Day from April. For example, in food project, students planned the menu, suppliers, selling price and the design of the food stands with their classmates. Also, there was a presentation called "Okunijiman", which helped to know cultures of many countries.

Erik, a student who made a presentation in "Okunijiman" to introduced America, and also joined the team of "Ebi Daimao" in food projects. He said, "Through the International Day, I got experience to cooperate with other people." By the way, team "Ebi Daimao" got sales No.1, and was commended for their team work. We believe that getting friends and cooperating with other people from different majors, classes, grades through the festival, will be a good experience for the future. We are looking forward to next year!

School Festival・International Day 2017

As an executive committee member,
worked with Japanese students!

GU MINGXIANG
Taiwan / Ustunomiya Nikken Institute of
Technology Japanese department

 Tokyo Film Center School of Arts
Grade 2

Performed on the stage

School Festival was held on June 10th and 11th, 2017. Not only Japanese students, but also foreign students participated to planning and operations actively.

1. Which part did you responsible for?

I joined the executive committee to help students for thinking about ideas of their projects.

As a store manager of our food stand, I considered all things about the store, including menu, design of the store, uniforms, and even making refreshment and selling.

2. What was the most enjoyable thing in school festival?

I was glad to produce products with juniors. There were many customers came to our stand and bought our hand-made food, I was happy to hear they said our food was delicious.

3. What's your plan in school and internship in your future?

I am going to produce more creations and shoot more films with my partners before I graduate.

Lead the school festival!

KO CHIA TSUN
Taiwan / Wenzao Ursline University of Languages

 Osaka Animation School
Creative department / Novelist Course

This time, we interviewed Ms.Ko who majors in novelist course. In school festival, students in every course have to responsible for some parts. Ms.Ko, as a leader of her course, was playing an active part in school festival.

"The reason why I applied the position of leader is that the quiz corner in our course last year was not so fun. I want to produce a corner that can show the

Picture of booth

features of our course. So in this year, we sold the short story books and the juice . Members wrote the stories, and classmates in comic & illustrator helped us to complete the illustrations. Through this experience, I realized the importance of cooperating with team members. I will make good use of this experience to my study or life in the future.

Dream of Debut Comes True

Contractor: Tamura Corporation
Occupation: singer

LAURA FERNANDEZ

Spain

Kansai College of Business and Language

TSM 渋谷 Tokyo School of Music, Shibuya campus
Singer Songwriter / Grade 2

Laura Cox, an international student of Tokyo School of Music, Shibuya campus, has contracted an agreement as a singer with a production company.

She came to Japan to study Japanese at the language school in Osaka from Spain. After graduating from Japanese language school, she entered Tokyo School of Music, Shibuya campus. Through the auditions what she has taken, such as new face excavations, she finally joined her production company now. She has uploaded four songs on Youtube. You can search "Lau Cox" to hear her beautiful singing voice!

The reason why I decided to study at Tokyo School of Music, Shibuya Campus is that they provide fulfilled support for foreign students and also for a debut. After the program of a personal consultation and trial lesson, I decided to apply to the school. I thought this school is good for my musical activities in Tokyo because it's located in Shibuya, the center area of entertainment. So there are many chances for foreign students like me.

I had a dream to sing my original songs, not someone wrote. When I was writing many songs, I had a new face scouting audition which held in our school every year. Moreover, I passed the audition with my original song.

In this event, the people involved in various entertainment industry come to school listening to a performance and having an interview with student's profile. That is a good chance for students like us.

*The story of the Debut

After finishing my presentation, I handed my profile to 5 companies and got interviewed. TAMURA CORPORATION is the last company that I got interviewed within 5 companies. I was the last interviewee and the interview time has already passed.

"You sing very well. But it becomes nothing only have skill. There are lots of people who sing well. You can't survive, if you don't have any special things to touch someone's heart." The interviewer, Mr. Tamura said. I was disappointed at that time because I realized that I am still an immature.

After few days, I was interviewed again with Mr. Tamura. I got a chance to sing, and finally I contracted with TAMURA CORPORATION.

*What kind of lessons did you get?

I think studying Japanese is very important. Tokyo School of Music, Shibuya Campus teaches basic skill of vocal. The most helpful training was breathing. I could realize the changing of my voice after I mastered breathing method. I also learned vocalization, posture, gazes, etc. I have to pay attention to many things when I am singing, not only voice.

* What kind of activities did you do?

When I lived in Osaka, I joined a cover band and usually had a concert at the weekend. For school festival in Tokyo School of Music, Shibuya

Campus, I wrote a song with other students of different courses and wrote lyrics on songs someone composed. I made a band, named 4 months Family(4MF) with other 3 students, and it was very enjoyable. I contracted with TAMURA CORPORATION now. It's hard to sing at other places often, but I can sing at school events as a member of the band.

*How's the atmosphere of the school and the lesson?

The comfortable atmosphere and having good relationship with everyone regardless of courses and ages are good points of the school. Teachers teach seriously, but never forget smiling and laughing. I like vocal training lesson especially. Due to the small group teaching, students are taught one by one. Classmates are all like family to me, we cry, laugh and agony together.

Company Project

Internship at "HILTON NISEKO VILLAGE"

YUNITA NIDYA SUSANT

Indonesia

Osaka International School of Culture and Language

 Osaka School of Culinary Arts
 Confectionery and Bread Making
 Patisserie course / grade 2

As a part of learning cooking and confectionery, YUNITA participated in a four-week industry internship. The place of the internship was at HILTON NISEKO VILLAGE. The hotel faces Mount Yotei, which represents the mountain in Hokkaido. It's located at the foot of the Niseko Annupuri Mountain. From Spring to Autumn, it offers golf, tennis, horse-riding, river rafting, hot-air balloon and other outdoor activities. In winter, it becomes a silver world, you can enjoy ski and hot springs there. The hotel welcomes customers warmly not only Japanese, but also foreigners. As an internship participant, YUNITA said, "I got sick after arriving there. I fully realized the importance of health care when working. In addition, I have improved the abilities in time-keeping and skills of communication when I made products. In order to build a hotel which could feel the spirit of Japan that never had before, I hope I can make good use of this experience and improve myself more." It seems that YUNITA has reaped a good harvest and got a big goal from the internship.

YUNITA & HUANG

Student Interviews

Participated in theme song production of Japanese enterprise

PARK JUNESOO

Korea

Toyo Language School

TSM Tokyo School of Music and Dance
 Music producer course / grade 3

I started classical piano music from high school and wrote songs sometimes. When I became 23 year-old, I started to consider a career in music. After entering TSM, the school life is really happy. I like the moments that producing something and having inspirations with my classmates who have same dream with me. This time, as producers, songwriters and music arrangers, we produced a theme song for Kidzania in a team. The song was adopted. Also, it was uploaded and played in the official site of Kidzania. Everyone was happy for the result. I want to use music to encourage depressive people. Producing good music that can only be created by "PARK JUNESOO", is my goal now.

Employment

Got offer from famous IT company !

Working as a IT Engineer @ GMO Internet, Inc.

GOMEZ SANTANA CHRISTIAN

Republic of Colombia

Kudan Institute of

Japanese Language & Culture

 Tokyo Design Technology Center
 Super IT Engineer course Grade 4

Hackathon

GOMEZ not only studied programming but also joined the team to create system and applications positively when he was in school. Also, he has received awards from Hackathon and Ideathon, those events are held flourishingly in IT industry. Participants are required to create new applications and projects within a limited time. In third year of school, he participated in many industry trainings of many famous companies, such as mixi, RAKUTEN, VOYAGE, Cyberagent, NTTdocomo, Gnavi, and got good reputations from those companies. At exhibition for the end-of-year projects, many companies expressed that they would like to work with him in the future. Finally, he decided to join GMO Internet, Inc. which is his first choice. We are looking forward to all of his continued successes as he endeavored.
