Today is the last class of my 3-year college life. Thank you very much! I will live as a designer from now on. I have many things to learn more and feel anxiety.

Sometimes I'm worried about whether my choice was correct, but I can't return the way I started to walk. It has no meaning to regret on it. Also, it is me that can decide the way I should go. I believe that I can reach somewhere bright and wonderful if I believe in myself and have proud of my way.

The graduation ceremony is the new beginning of my life. I will do my best!

In April 12th, the entrance ceremony of COM GROUP colleges in Tokyo was held. We interviewed two students of Tokyo Design Technology Center about their impressions. Ms. CHENG said, "I thought that it is very important to have passion to "my favorite" and my will to make it come true after attending the ceremony. In the first part, many messages are put in a congratulatory address and especially I was impressed by Mr. Yukawa's message, 'I want you to participate in election'. In the second part, I was impressed to see many awesome presentations. When I see the dance by 300 dancers and the monkey show, I felt strongly the achievements they accumulated on a daily practice. Also, I was very moved to listen to my favorite song "Les Miserables" with wonderful performance and singing by big band and powerful chorus "You Raise Me Up". I thought I want to become a person who can move people's heart someday. "The other international student Mr Chen said" I'm enjoying my new life but I also felt anxiety. I'm glad to participate in the ceremony. I gained courage from teachers' message and I thought I want to be like my seniors someday from their presentation."

In April 19th 2018, the entrance ceremony of Kansai area was held. In this year, 105 international students from 12 countries was enrolled to our colleges and it was the awesome ceremony with fine weather and clear blue sky. Mr. Mart from Turkey said "I wore the suit for the first time! I was very glad to take photos with my classmates because the entrance ceremony was held after a while since the class started. Also, I became friends with classmates whom I've not talked with yet and people in other majors and colleges. I made up my mind to do my best when I saw the presentation of seniors who is working active in each place after the graduation! I was impressed by the live by Mr. Mitsuru Matsuoka the most. I gained courage from his message "a few years ago, I sat here like you and felt anxiety about being a professional." My anxiety about "not having confidence of my picture and becoming a professional" was erased at once by his message. I want to spend my college life with stimulation I received at the ceremony.

In April 10th, Mr. JAY Koottarappallil, the president of an American Game Company "White Moon Dreams", came to our college and the special lecture was held for second and third grade students of game, CG creator major. He told them about necessary ability for game production and current status of overseas game industry. International students who are good at English asked Mr. JAY many questions continuously and it is about to run out of time of Q&A session. Mr. SOH, a third-grade student of game graphic and character major asked a question of the difference between overseas game industry and Japanese one and Mr. JAY gave much global information while telling the example of America, Europe and Asia. After that, Ms. CINDY, a second-grade student of game programmer major said she understood she needs not only knowledge of her major but also broad knowledge and skills and she was motivated so much. Special lecture from the overseas active creator stimulated students, so we are looking forward to seeing better works from them.

First Time Participation in E-sports World Championship

Tokyo School of Anime
E-sports Professional Gamer Major / 2nd grade

E-sports is a special field.

I decided to study in Japan after graduating from the University in China.

Honestly speaking, I thought E-sports industry in Japan is behind the world, so I didn't know how my future would be.

After entering the college, I met my teacher and classmates and I was impressed because they have many passions to E-sports. I was glad to meet friends with whom I can chase a dream.

Then I studied very hard and my skills got improved.

In summer of 2017, when I was in a first grade, I took the best score in Japan with my seniors and participated in the world championship .

We had training for a month to prepare for the championship. Thanks to this intensive training, our teamwork got improved so much. I think it is the same level as the team which is active in the world. Unfortunately, we couldn't win at one-week championship. However, I didn't regret because I tried very hard.

I want to tell this spirit to my juniors.

I will keep on studying hard this year and make my skills improved to participate in the championship with you.

Tokyo Communication Arts College
Product & Interior Design / 3rd grade

■ The reason why you decided to study in Japan

I like Japanese culture and wanted to go to Japan since I was a child. I studied Japanese to know more about Japan and decided to study in Japan.

■ The beginning of aiming for design industry

When I was in Thailand, I got a Japanese souvenir. Its shape and graphic were very beautiful and this was the beginning when I got interested in the package design.

■ The reason why you decided to work at the company from which you got a job offer

First, I participated in the internship which my teacher introduced to me. I experienced actual work and thought it would be fun if I work there. Also, I was relieved because the graduates of Tokyo Communication Arts College are working there.

■ Future Goals

I want to enjoy my job and experience many things. In the future, I want to tell my experience at the University in Thailand.

Recording Engineer Course / 3rd grade

The experience of professional work with tutors raised me up. The beginning of getting a job offer from this studio is my tutor taking me there. I participated in jobs at many recording studios but I like the atmosphere of this studio and I strongly wanted to work there. I had a chance to apply for recruitment for new graduates and got a job offer. In my college, I created music together with students of composition major. I learned teamwork as well as the job of main engineer. I think it important to talk with not only students in the same country but also in other countries and be able to speak Japanese more naturally.
